

Recycle your old electricals here!

If you're buying a new electrical item, we will recycle your old one **for free.**

Please do not throw items marked with this symbol in your bin. This is because:

- Unwanted electrical equipment is the UK's fastest growing type of waste.
- Many electrical items can be repaired or recycled, saving natural resources and the environment.
- If you do not recycle electrical items they will end up in landfill where hazardous substances will leak out and cause soil and water contamination – harming wildlife and also human health.

The Waste Electrical and Electronic Equipment (WEEE) Directive requires countries to maximise separate collection and environmentally friendly processing of waste electricals. In the UK, distributors including retailers must offer all customers buying new equipment free take-back for their old electricals. This is done on a like-for-like basis in stores, and must include collection of all small electricals where store space allocated to electricals is over 400m², or by supporting the national network of WEEE recycling centres established by local authorities.

Hand your unwanted items to a member of staff.
