# Introduction

The Racing Series SL4000 gaming chair brings unparalleled levels of ergonomic support and adjustability. Crafted with high-density padding and a contoured backrest, it allows for longer and extremely comfortable gaming sessions

# Highlight Features

## Effortless Assembly

A patent pending “Slide-In” design mechanical structure that requires no more than one person to assemble.

## Steel Frame

A sturdy and rigid steel frame support ensures long lasting durability, while keeping the chair secure, stable, and comfortable at all times.

## **Ultra Premium High Resiliency Foam**

Our interior foam boasts a density that puts it well above the standard High Resiliency foam. Where High Resiliency foam sits at approximately 2.5lbs per cubic foot, our foam stands up to 4lbs per cubic foot, inching it near the realm of memory foam. The elasticity of the foam helps prolong the comfort life of the chair and adds to the overall durability of the product.

## Elegant, Durable Exterior

Made from premium quality PVC leather with stain resistant characteristics, the SL4000 has an extra dense foam padding that adds great support and comfort. The breathable open-cell structure limits heat being trapped.

## Additional Features

### Penta RS1 65mm/2.5" Caster

Custom racing style caster coated with polyurethane (PU) for soft and smooth gliding on any surface. (color matching chair)

### **Soft-Glide Wheels / Aluminum Alloy Foot**

The SL4000's wheels are engineered for quieter operation and greater resistance to foreign objects and debris. The 5-star base (made from aluminum alloy) keeps the chair solid, stable, and lightweight.

## Gas Lift

The SL4000 is fitted with an industrial-quality Class-4 Gas Lift cylinders for extra durability and ease of use, while keeping your seat maintained at the proper height.

## Extra Accessories: Cushions

Additional Memory Foam Neck Support and Lumbar Support cushions are included.

# Adjustability

## Adjustable Seat Height

The SL4000's seat and height adjustability ensures correct ergonomic posture and prevents stress to your back. Having good range of adjustability allows you to be at an optimum angle in relation to your desk, this reduces back and neck pains.

## Adjustable Backrest

Features independent back angle option. An angle-adjustable backrest to help you adjust your sitting position throughout the course of your gaming experience (up to 140 degrees).

## Adjustable Tilt with Locking System

Our adjustable tilt tension mechanism allows you to increase or decrease the tension by easily turning the knob to match your body weight. This allows you to rock comfortably, without heavy pushing, reducing muscle fatigue.

## Adjustable 4D Armrests

4D customizable armrest provides a natural support of the arms with greater range of width and height adjustments. Benefits includes better blood flow and eliminates pain and injury to the wrist and arms.
